

Programming instructions for KF105

To program multiple remotes you will need to have all the remotes available for the car as you will need to relearn them all.

1. Sit in the vehicle with the doors closed
2. Turn key to the ACC position and press the rear demist button 3 times, doors will now lock. Please note the speed in which the demister button is depressed in the corresponding fitment video.
3. You then press the lock or unlock button on the remote being trained, the door locks will cycle up and down.
4. Turn the ignition to the OFF position to exit the learning mode
5. Your remotes are now programmed to the vehicle.

WARNING! This remote control contains a button/coin cell battery. It is a lithium button/coin cell battery. If swallowed or placed inside any part of the body, a lithium battery can cause severe or fatal injuries within 2 hours or less. The battery is hazardous and should be kept out of reach of children at all times whether new or used. If you think batteries may have been swallowed or placed inside any part of the body, seek medical attention immediately or contact the Australian Poisons Information Centre on 13 11 26 or the New Zealand National Poisons Centre on 0800 764 766.
